

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. PREFACE.

THE following features, among others, will, it is believed, commend this spelling-book to the favor of teachers:—

1. The **selection of the words**. Only such as are met with in ordinary reading have been taken.
2. The **classification and arrangement**.
3. The **dictation exercises**.
4. The **variety in the kind of lessons**.
5. The treatment of the few really useful **rules for English spelling**.

The **pronunciation** is shown by the headings of the lessons, by marked letters, and by re-spelling whenever thought necessary.

L. J. C.

The *world* we live in is round like a ball. It is part land and part *water*. There is not so *much* land as *there* is *sea*. The *sea flows* round the land.

Men and *beasts* and *worms* live on the *earth*. Trees and *plants* grow in the *soil*. The soil of the earth has stones, and sand, and clay, and *mould*, with *ores* of gold and *iron* (*īrn*), *lead* and tin.

Some parts of the earth are cold and some are not. In the cold parts of the earth are snow and ice. In the hot parts of the earth trees and plants grow *very* large.

The sea is very large. It is salt to the taste, and looks blue to the *eye* when the sky is *clear*. Fish of all kinds live in it. Ships and *boats sail* on it from place to place.

The sea has a tide which ebbs and flows. Twice a day the waters are *high* and twice a day *they* are low. The sea is from two to three miles deep in some parts.

FIFTEENTH SECTION.

PREFIXES.

A prefix is a syllable placed before a root to form a derivative word. Thus, in the word *export*, *port* is called the root, and *ex* the prefix. So, in the word *dissyllable*, *dis-* is the prefix. In *persuade* it is *per-*. In *describe* the prefix is *de-*.

The following is a list of prefixes in general use :—

Prefixes.	Examples.		
<i>a, on, in</i>	<i>afoot'</i>	<i>aboard'</i>	<i>ashore'</i>
<i>a, ab, or abs, from, away</i> }	<i>avert'</i>	<i>absolve'</i>	<i>abstract'</i>
<i>ad,* to, at</i>	<i>advert'</i>	<i>affix'</i>	<i>attract'</i>
<i>ante, before</i>	<i>an'techamber</i>	<i>an'tedate</i>	<i>an'tecedent</i>
<i>anti, against</i>	<i>an'tislavery</i>	<i>antip'athy</i>	<i>antic'ipate</i>
<i>be, to make.</i>	<i>becalm'</i>	<i>befoul'</i>	<i>benumb'</i>
It is often <i>intensive</i> , as <i>bedizen</i> , to <i>dizen all over</i>			
<i>besprinkle</i>	<i>bewail'</i>	<i>bedaub'</i>	
<i>circum, circu, around</i> }	<i>circum'ference</i>	<i>cir'cuit</i>	<i>circu'itous</i>
<i>con, com, col, cor, with, together</i> }	<i>connect'</i>	<i>compress'</i>	<i>correspond'</i>
<i>contra, counter, against</i> }	<i>contradict'</i>	<i>contravene'</i>	<i>counteract'</i>
<i>de, down, from, concerning</i> }	<i>descend'</i>	<i>deduct'</i>	<i>describe'</i>
<i>dis, di, dif, not, the opposite of, asunder</i> }	<i>divide'</i>	<i>displease'</i>	<i>disperse'</i>
	<i>disallow'</i>	<i>disagree'</i>	<i>disbelieve'</i>

* The final letter of a preposition, in composition, is often changed to the initial letter of the root; hence *allude*, not *aallude*, *accede* not *adcede*, etc.
